

Nanco+: Xilon presents functional elegance for the contemporary bathroom

Civita Castellana, July 2025 - Xilon Srl, a reference company in the bathroom furnishing sector, presents the Nanco+ collection, a proposal that combines contemporary design, aesthetic elegance and maximum functionality, responding to the increasingly sophisticated needs of the modern bathroom.

The Nanco+ collection stands out for its versatile monobloc solutions, available in four sizes (50, 60, 88 and 106 cm) to adapt to any type of environment.

The compact 50 cm and 60 cm models are ideal for small spaces, available in both wall-hung and floor-standing versions, with doors or drawers. The 88 cm version offers the perfect balance of design and storage space, also available in wall-mounted or floor-standing versions, with deep drawers or doors. Finally, the 106 cm model offers ample storage space and maximum storage capacity, guaranteeing freedom of use and impeccable organisation of space.

The distinctive element of the collection is the Nanco washbasin, made of Italian ceramic with a 20 cm deep basin, perfect for easy everyday tasks such as washing bulky objects, handling laundry and even bathing small pets. The washbasin, characterised by the refined top thickness of only 15 mm, is available in glossy white for the standard version, or in the matt finishes white, black, sand and sage. It can be further customised with the innovative Materie finishes - Travertino and Peperino - that recall the appearance of natural stone. Finally, it can be enhanced with the SIL® wringer for laundry use.

Exclusive to Nanco+ is the Calàn finish, an undulating surface available in Walnut Wood and the different Xilon matt lacquer shades, perfect for adding a touch of colour in harmony with the room.

The Nanco+ collection is also distinguished by functional details such as the hidden internal drawer, a practical additional space that is only visible after the main drawer has been opened, ideal for small items such as make-up and personal accessories.

Every detail in this collection is taken care of to meet contemporary aesthetic requirements. Like the groove handle that can be customised with the same finish as the cabinet, for an elegant single-colour effect.

With Nanco+, Xilon proves that beauty and practicality can coexist harmoniously in a single room, meeting the needs of contemporary living with style and functionality.
